

10 Reasons why you should purchase a Preventative Maintenance Agreement

GENERAC
POWER SYSTEMS, INC.

1. Standby systems require periodic preventative maintenance to ensure long-term, trouble-free operation.

Batteries, engine oil, antifreeze, belts and hoses are all subject to deterioration, not only from operation, but also from time itself. Oxidation, corrosion, separation and fatigue all jeopardize your power system's components and operation.

2. Periodic preventive maintenance saves you money.

Early detection can help you identify small problems before they become major repair costs. Spark plugs, hoses, ignition systems, batteries, belt adjustments and exhaust systems inspections are but a few of the checks performed by our experienced service technicians.

3. Electrical power when you need it the most. Avoid costly losses.

You invested in a standby system to protect your valuable computer data and equipment, and to keep your operations running at all times. Avoid costly losses by properly maintaining your standby systems with Energy Management Corporation.

4. Warranty coverage

The warranty coverage on any standby system depends on proper installation and regular maintenance. Count on Energy Management Corporation to ensure that your warranty requirements are always met. We keep permanent records of all service repairs.

5. Insurance.

A Preventative Maintenance Agreement is your best insurance to ensure that your standby systems will operate when you need it. Also, NFPA110 legally requires regular scheduled maintenance on all nursing homes and health care facilities.

6. Minimize emergency situations.

Help prevent an emergency occurrence by properly maintaining your standby system with a preventative maintenance agreement. Annual load bank testing can be scheduled to save you costly engine repairs due to wet stacking and to ensure your standby system is operating at top performance.

7. Flat rate labor and discounted parts.

All preventative maintenance agreements are calculated on a flat rate basis, so no matter how long a visit takes, you are charged the same predictable amount. Parts are discounted 15% and maintenance parts kits provide additional savings.

8. Additional discounts

Customers on a current preventative maintenance agreement enjoy scheduling priority, discounted labor and parts rates on normal and emergency service calls.

9. Convenient schedule

We do our best to schedule visits to your convenience, not ours.

10. Expert technicians

All our service technicians are factory trained and authorized.
